### **PROFESSIONAL ACTIVITIES**

- *Areas of Interest and accomplishments*

The understanding and development of biobased solutions to economic and environmental issues is at the core of much of my research. The focus has been on the integrated utilization of plant biomass through a comprehensive understanding of the underlying fundamentals. Therefore, **advance in analytical methodology** has been of primary importance of my research activity.

In the past 6 years I have attained approximately \$80 thousands and \$500 thousands in technical service funding and research funding as co-investigator. To date I have authored and co-authored eighteen published papers in five various peer-reviewed journals. Many of my publications have been targeted to the premier, high impact factor journals in my field (data from 2004), including *Holzforschung* (1.014 impact factor - #2) and the *Journal of Agriculture and Food Chemistry* (2.322 impact factor - #1) which consistently rank among the highest impact factors of all the Materials Science (Paper & Wood) and Agriculture Journals, respectively.
